Established 1979

# So Much More Than Just A Conservatory

## Sun Trade

### Your Conservatory Partner & Specialist

Over the past twenty years conservatories have grown to be a major factor when considering home improvements. For this very reason, year on year, we invest in new machinery, manufacturing techniques and staff training to ensure our customers stay ahead of the competition in an increasingly competitive market.

This investment, along with the use of only proven industry names, ensure that you, our customer, only get the very best of products backed by industry leading support.

Throughout our specialist team of processors and conservatory roof fabricators we now manufacture in excess of 60 roofs per week, all from our dedicated conservatory roof plant.

Unlike other fabricators, our service is not limited to the products we provide, our roof division are always on hand to help - from difficult surveys to installation tips and tricks.

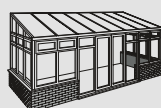

- Same Day Quotation Service.
- From 10 Day Turnaround.
- Comprehensive Technical Support.
- Complete Ultraframe Product Range.
- Conservatories Designed for Post Code.
- Over 13 Stock Colours to Choose.
- Comprehensive Glazing Options.
- Variety of Polycarbonate Options.

## What Ever The Style

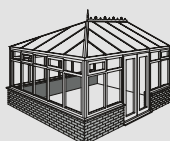

Through our in-house team of specialists we are better positioned than ever to advise customers on a style of conservatory for the space they have.

Via our enhanced computer software and technical expertise not only can our team turn your vision into reality but we can also ensure structural stability by designing for the installation post code.

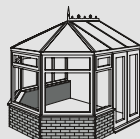

### Lean-To

A conservatory with a mono pitched roof. The pitch of the roof can be varied to as low as 2.5° making it both a popular and a versatile option.

### Georgian and Edwardian

A square fronted duo-pitch with a central ridge, this conservatory style maximises floor space. Available in sizes up to 6.3m wide

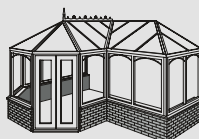

### Victorian

A bay fronted duo-pitched roof with a central ridge, typically with three or five facets at the front. Available in sizes up to 6.5m wide

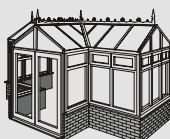

### Gable

Gable ended roofs consist of duo pitched sides with a flat faced frontage. This style can include the use of a decorative front utilising profile or georgian bars.

### P-Shaped

A combination shaped roof usually constructed from a lean-to section at the side of a Victorian/Edwardian shaped roof.

### T-Shaped

A combination of roof styles, T-shaped conservatories are aesthetically balanced and create a versatile living space.

## Dynamic Coloured Conservatories

Unlike other fabricators we pride ourselves on being able to offer a complete suite of products. Whether your client is looking for a white full glass conservatory or a one in chartwell green with a matching bi-fold doors we have you covered.

By combining REHAU frames with the Ultraframe roofing range we can ensure that our customers not only get reliable products, but as both use the extremely durable Renolit foil range that they will be an exact colour match.

Unlike other companies our foiled product range benefits from a fully suited range of ancillaries. Conservatory panels, a

selection of couplers, cills and decorative trims are all available in as little as 10 working days!

The range is further complimented by the seemingly endless selection of glazing options - ranging from the traditional Activ Blue to more striking greys and oranges, what ever your customers preference we have an option to suit.

White

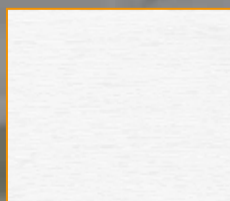

Mahogany

Rosewood

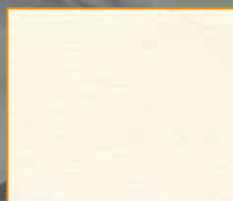

Golden Oak

Whitegrain

Irish Oak

Cream

Black Brown

Chartwell Green

Anthracite Grey

Smooth Grey

On White

The above colours are only as accurate as the printing process allows, colour swatches are available on request via your local trade counter or emailing: [marketing@suntradewindows.com](mailto:marketing@suntradewindows.com).

## The Extras, As Standard.

As we manufacture the Ultraframe roof you're guaranteed a variety of unique extras all at no extra cost. From the wide selection of glazing and foil options to the unique components used for manufacture, every roof is built with care and comes comprehensively guaranteed to last for years to come.

### Twin Wall Chambered Top Cap

The innovative twin wall chambered top cap not only reduces condensation but also greatly improves thermal performance, meaning the temperature of the conservatory is much easier to control.

### Innovative Anchor Clips

The new anchor clip which provides additional reassurance against risk of the PVC top cap moving, also aids in maintaining the seals of the jack rafter and ridge positions.

### Trickle Ventilation System

Through continuous product development the Ultraframe roof boasts an integrated ventilation system that allows warm moist air to escape, meaning your customer can benefit from a virtually condensation free conservatory.

### Reduced Tie Bars

Unlike other systems on the market we recognise that whilst a tie bar can be essential in supporting larger roofs, they are not always welcomed by the home owner. Through careful research a range of structural components have been developed to remove the necessity of tie bars.

### Decorative Options

With our roofing system you have the added availability of internal detailing. The Ultraselect strip options adds that extra touch of elegance internally with the decorative fascia completing the range.

# Ultrasky

**SKYLIGHT** by Ultraframe

## Flat Skylight

With unrivaled looks and thermal performance, the Skylights distinctive, sleek and frameless edge to edge glass, gives a stunning contemporary look. UltraSky Flat skylight allows the largest possible amount of light to be brought into the room, with uninterrupted sightlines. It brings a stylish ambiance to a home and its minimalistic roof frame ensures that it suits any style property.

Thanks to it's unique structural design it is not only the best looking Skylight but one of the best performing double glazed on the market.

- Simple pre-assembled design with unique click-fit installation process.
- Available in White, Grey and Black
- Double seal gaskets with high compression to stop degrading
- Finline plasterboard trim

### Maximum Light

The unique aluminium external and internal capping and bespoke structural UPVC internal core, make this the ultimate glazed Flat Skylight. Sitting flush with the internal plaster line, the fixed Flat Skylight appears frameless from the interior of the home, creating the illusion of an open roof space.

### Ultimate Performance

With an overall U-Value of 1.2, the fully insulated frame with 'Warm Frame' technology combined with noise reducing glass means that Ultrasky Flat Skylight blocks out noise from the outside and is unrivalled in thermal efficiency.

### Minimal Sight-lines

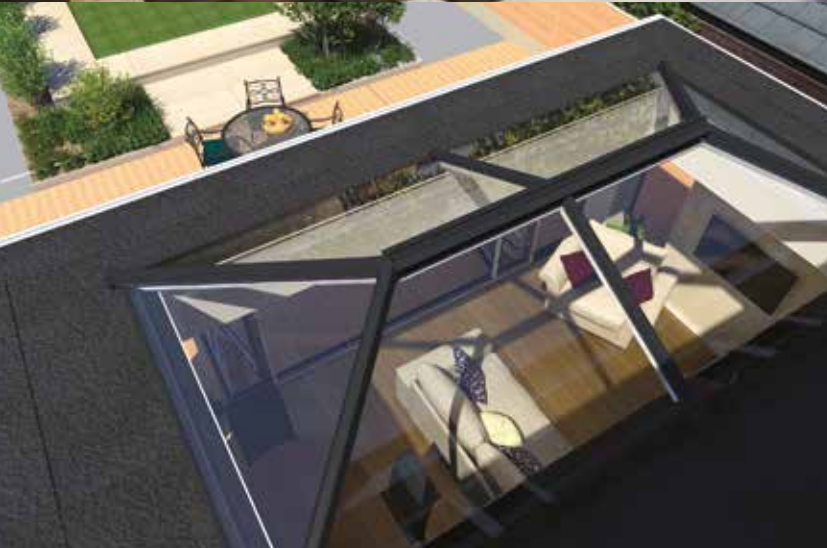

The minimalistic contemporary external design with flush glazing gives a sleek, modern appearance and is a stunning addition to any home extension.

### Leading Technology

Noise reducing, toughened glass means that Ultrasky Flat Skylight blocks out noise from the outside. Solar control and low-e coatings along with argon gas filled cavity, helps to control the amount of visible light, UV and heat that passes through the glass.

ultraSky

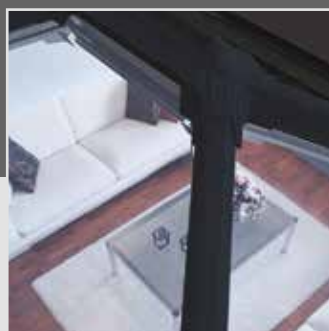

## UltraSky

Whether installed on a new build extension, orangery, or inserted into an existing flat roof, an UltraSky rooflight is the perfect solution when you want add the feeling of space and natural light to any type of property.

UltraSky has been designed around offering maximum uninterrupted sight lines – bar numbers are reduced and the ridge board and hub ends are as unobtrusive as possible. Enhanced thermal performance makes it ideal for use in domestic properties.

Our highly thermally efficient glazing options will help reduce heat loss and noise pollution, whilst letting the desired amount of light into the room. By utilising a unit with a 1.1 U value on a standard 1m x 2m rooflight you can achieve an impressive 1.4 W/m<sup>2</sup>K.

- Available in as little as 10 working days.
- Reduced glazing bars giving maximum light.
- Available in PVC and aluminium options.
- Range of matching internal finishes.
- Easily achieves 1.4 U Value, or better.
- Available up to 2m x 4m.
- Choice of roof vents.
- Chambered PVC top caps.
- Thermally broken aluminium ridge body.
- Low profile eaves beam.
- Compatible with self cleaning units.
- Unique unobtrusive design.

**ProRoof**  
Low Cost Roofing Solutions

## The ProRoof

Simple yet elegant, economical yet built to last, the new ProRoof from Sun sets a new precedent for the industry. Purposely designed around the most common colours, styles and options, the new roof has been streamlined to cater for what you need most.

Available in a select number of styles and colours the new ProRoof from Sun provides you with a high quality, yet economical solution to the most commonly requested types and styles of conservatories.

The multi chamber top caps and insulated glazing bars provide the best thermal performance and U Values, whilst little extras such as glazing anchor clips lets you know the product is built to last!

- Available in 10 working days or less.
- Cost effective roofing solution.
- Available in white and smooth grey on white.
- Reduced need for tie bars.
- Condensation reducing top cap design.
- Glazing straps reducing top cap movement.
- Self cleaning glass friendly gaskets.
- 10 year guarantee as standard.
- Seemingly infinite selection of glazing.
- Comprehensive polycarbonate options.

## The Classic Roof

Sun's Classic Roof may be classic by name but is certainly not by nature. Simple extras such as insulated glazing bars and multi chamber top caps make for a trouble free installation that's guaranteed to last for years to come.

With over 1.5 million installed in the UK alone our Classic Roof is tried, tested and trusted. It can be designed, specified and engineered to a specific consumer postcode, ensuring the roof is always configured accurately and performs perfectly year on year.

The Ultraframe Roof that we use is the most insulated glazed roof on the market today. The bars that run between the panels in the roof of your conservatory are covered with protective top cappings and through the use of chambered technology aid the thermal efficiency of the roof.

- Available in as little as 10 working days.
- Large selection of colours available.
- Improved range of structural components reducing the need for tie bars.
- High strength twin wall chambered top cap reducing condensation.
- Comprehensive polycarbonate options.
- Seemingly infinite selection of glazing.
- Co-extruded gaskets, designed specifically for compatibility with self cleaning glass.
- Anchor clip offering additional security against top cap movement.

## LivinRoom

Utilising Classic Roof technology, LivinRoom offers so much more than either a standard conservatory or an extension ever could. The variable depth insulated perimeter ceiling provides the home owner with an orangery type experience at a fraction of the cost.

By combining the light from a conservatory with the feel of an extension the LivinRoom provides greater overall value and the best of both worlds. This innovative product provides the home owner with a real feel of grandeur whilst maintaining that 'living room' feel.

The LivinRoom with its variable depth perimeter ceiling provides the perfect housing for spot lights and speaker systems - for that extra touch of class. Externally, the cloaking screen and optional cornice provides the upper market feel all whilst maintaining a fantastic price point.

- Offers the light of a conservatory but the feel of a traditional extension.
- Available in as little as 10 working days.
- Enhanced thermal performance.
- Perimeter ceiling options - up to 1.2m.
- Available in 15° to 40° pitch.
- Available as full frame, dwarf wall, brick pier or insulated loggia column options.
- Cloaking screen conceals fixings.
- Comprehensive 10 year guarantee.
- Suitable to take spot lights and speakers.
- Comprehensive range of glass options.

**Living**ROOF

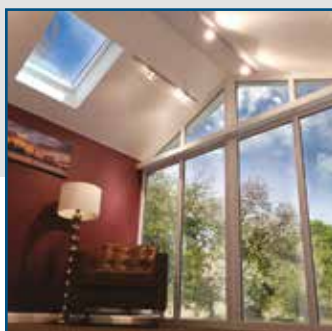

## LivinRoof

LivinRoof is the only roofing system designed to give the flexibility to combine solid and glazed roofing seamlessly. Offering the best of thermal performance of the range LivinRoof provides a roof that is guaranteed to offer maximum use any time of year.

Whether you are constructing a new home extension or replacing an old existing conservatory roof the LivinRoof provides total design flexibility and the ability to create stylish and thermally efficient rooms like no other solution on the market.

With insulated composite external panels and a high performance PU board insulation, the LivinRoof is one of the most versatile and robust systems you can buy. Finished with a striking vaulted ceiling and internal pelmet the finished product is truly unique to the market.

- Greatly improved thermal performance when compared to a standard conservatory.
- The only solid roof on the market that seamlessly integrates glazed panels.
- Completely unique configurations that are only available with LivinRoof.
- Striking vaulted ceiling with internal pelmet - ideal for lighting & speakers.
- Can incorporate a suspended ceiling offering continuity from adjoining rooms.
- Smart pre-fabricated design eliminating on site cutting, waste and disruption.

## UltraRoof

The new lightweight tiled roof is the perfect solution for customers looking to replace a tired old conservatory roof, and all in under one day! Constructed from 3 simple components, this easy to install roof is faster than any other solid roof on the market to date.

For those who want a solid roof but still want to retain an element of light within the room, the clever configurable technology in the UltraRoof allows the installation of multiple glass panels or Velux Windows – this can help project light into the adjacent room and allow a truly bespoke design. Extremely thermally

efficient due to its advanced design, UltraRoof is fully compliant with Building Regulations and has LABC, LABSS and JAHl system approval. UltraRoof has a proven pedigree and will provide comfort and peace of mind for many years to come.

- Available in as little as 10 working days.
- Interlocking slate tile.
- Enhanced thermal performance.
- Incorporate large rectangular glass panels.
- Small external soffit and internal pelmet.
- No tie beam - ever.
- Rapid install - 2 hours water tight.
- 3 slate colours options.
- Bespoke designs.
- Constructed in 3 simple components.
- All external items included i.e. gutter, fascia.
- 10 year guarantee.

# Comprehensive Glass & Polycarbonate Options

As with all of our products our conservatory roof glazing options are no different. Utilising Planitherm, Saint Gobain, Guardian, Celsius and the unique to Sun Element glass ranges we are able to tailor your products even further, enabling you to meet your customers exact requirements.

## First Element

Recommended for conservatory frames, First Element is the perfect upgrade from standard glass.

With a neutral / grey tint that reduces glare, First Element provides much better protection than standard glass. First Element is highly recommended if you plan to use either First or Ultra in your roof - ensuring your conservatory performs.

Self Cleaning:	✓
Tinted:	Neutral
U Value w/m2k:	1.0
Solar Rejection:	68%
Light Transmission:	42%
UV Protection:	83%

## Ultra Element

The ultimate in performance glass, Ultra Element combines the best in U Value, UV protection & solar rejection.

Visually the blue tint serves to enhance colours from the garden without darkening the room. Externally the tint is more visible, giving a warm, cosy feel to the conservatory.

Self Cleaning:	✓
Tinted:	Blue
U Value w/m2k:	1.0
Solar Rejection:	80%
Light Transmission:	27%
UV Protection:	92%

### **Self Cleaning Glass**

**Variants: Blue, Bronze, Grey, Neutral & Aqua**

This unique dual action glass uses the forces of nature to help keep the glass free from organic dirt, giving you not only the practical benefit of less cleaning, but also clearer, better looking conservatories. Available in a popular range of colours and with a selection of backing glass you can achieve not only great looking installations but meet demanding U Value requirements with ease.

### **Anti Sun**

**Variants: Blue, Bronze & Grey**

Our range of solar control glass helps ensure the conservatory remains usable all year round by controlling solar heat radiation from the sun with enhanced reflectance, transmittance and absorption properties. Available in a wide selection of colours to compliment each type of home it is the perfect choice for customers who are north facing and would otherwise be exposed to high solar gain - making the conservatory unusable.

### **Customisable Units**

**Variants: Multiple External and Internal Options**

Through our in-house team of industry experts we are now better positioned than ever to create completely bespoke units tailored to your exact requirements. Whether you need self cleaning glass with a specific U Value or a solar control unit that reduces solar glare we can not only spec the unit to match but also provide comprehensive technical data sheets to support it. For more information contact our in-house technical team.

### **Polycarbonate**

**Variants: Bronze, Clear, Opal, Grey, ST Blue**

Available in both 25mm and 35mm variants our comprehensive selection of polycarbonate offers an economical alternative to glass. Available in all of the popular colour variants and with U Values as low as 1.1 w/m<sup>2</sup>k our range has been designed around offering comprehensive solutions for any type of application. ST Blue completes the range by utilising cool light technology offering the same low u-value as glass - 1.2 w/m<sup>2</sup>k.

## Uncompromising Quality and Service.

For nearly 40 years we have been at the forefront of the UPVC industry. Continued investment in new sites, machinery and staff year on year ensures that our customers receive the best products backed by industry leading service.
