

THE SUN TRADE PROROOF

Established 1979

 **ProRoof**
Low Cost Roofing Solutions

The ProRoof

Simple yet elegant, economical yet built to last, the new ProRoof from Sun sets a new precedent for the industry. Purposely designed around the most common colours, styles and options, the new roof has been streamlined to cater for what you need most.

Available in a select number of styles and colours the new ProRoof from Sun provides you with a high quality, yet economical solution to the most commonly requested types and styles of conservatories.

The multi chamber top caps and insulated glazing bars provide the best thermal performance and U Values, whilst little extras such as glazing anchor clips lets you know the product is built to last!

- Available in 10 working days or less.
- Cost effective roofing solution.
- Available in white and smooth grey on white.
- Reduced need for tie bars.
- Condensation reducing top cap design.
- Glazing straps reducing top cap movement.
- Self cleaning glass friendly gaskets.
- 10 year guarantee as standard.
- Seemingly infinite selection of glazing.
- Comprehensive polycarbonate options.

New Roof, Same Quality & Service

As with all of our products the new ProRoof comes with the same exceptional guarantees and service you have come to expect from Sun. Our dedicated team of technical experts are always on hand to advise on the best style, design and glazing - what ever the type of installation.

The new ProRoof from Sun is processed through our bespoke software to not only turn your vision into a reality but guarantee the finished product is exactly how you want it. As well as this each conservatory is specified to the installation addresses unique post code ensuring the product is built to last.

Comprehensive Service

You can rest easy knowing that the new ProRoof from Sun comes with a comprehensive 10 year guarantee. Furthermore our dedicated in house team are always on hand to help with any technical or design considerations you're unsure of.

Reduced Tie Bars

Whilst we recognise that a tie bar can be essential in supporting larger roofs, they are not always welcomed by the home owner. Through careful research, a range of structural components have been developed to limit the use of tie bars.

Twin Wall Chambered Top Cap

The innovative twin wall chambered top cap not only reduces condensation but also greatly improves thermal performance, meaning the temperature of the conservatory is much easier to control.

Comprehensive Glass & Polycarbonate Options

As with all of our products our conservatory roof glazing options are no different. Utilising Saint Gobain, Celsius and the unique to Sun Element glass ranges we are able to tailor your products even further, enabling you to meet your customers exact requirements - with the minimum of hassle.

Self Cleaning Glass

Variants: Bioclean Blue, Bronze, Grey, Neutral & Aqua

This unique dual action glass uses the forces of nature to help keep the glass free from organic dirt, giving you not only the practical benefit of less cleaning, but also clearer, better looking conservatories. Available in a popular range of colours and with a selection of backing glass you can achieve not only great looking installations but meet demanding U Value requirements with ease.

Anti Sun

Variants: Blue, Bronze, Grey

Our range of solar control glass helps ensure the conservatory remains usable all year round by controlling solar heat radiation from the sun with enhanced reflectance, transmittance and absorption properties. Available in a wide selection of colours to compliment each type of home it is the perfect choice for customers who are north facing and would otherwise be exposed to high solar gain - making the conservatory unusable.

Customisable Units

Variants: Multiple External and Internal Options

Through our in-house team of industry experts we are now better positioned than ever to create completely bespoke units tailored to your exact requirements. Whether you need self cleaning glass with a specific U Value or a solar control unit that reduces solar glare we can not only specify the unit to match but also provide comprehensive technical data sheets to support it. For more information contact our in-house technical team.

Polycarbonate

Variants: Bronze, Clear, Opal, Grey, ST Blue

Available in both 25mm and 35mm variants our comprehensive selection of polycarbonate offers an economical alternative to glass. Available in all of the popular colour variants and with U Values as low as 1.1 w/m²k our range has been designed around offering comprehensive solutions for any type of application. ST Blue completes the range by utilising cool light technology offering the same low u-value as glass -1.2 w/m²k.

First Element

Self Cleaning:	✓
Tinted:	Blue
U Value w/m2k:	1.0
Solar Rejection:	83%
Light Transmission:	30%
UV Protection:	94%

Recommended for

Roof glazing, Ultra Element combines the best in U Value, UV protection & solar rejection.

Visually the blue tint serves to enhance colours from the garden without darkening the room. Externally the tint is more visible, giving a warm, cosy feel to the conservatory.

First Element

Self Cleaning:	✓
Tinted:	Neutral
U Value w/m2k:	1.0
Solar Rejection:	58%
Light Transmission:	61%
UV Protection:	73%

Recommended for

Conservatory frames, First Element is the perfect upgrade from standard glass.

With a neutral / grey tint that reduces glare, First Element provides much better protection than standard glass. First Element is highly recommended if you plan to use either Elite or Ultra in your roof - ensuring your conservatory performs.

Uncompromising Quality and Service.

For nearly 40 years we have been at the forefront of the UPVC industry. Continued investment in new sites, machinery and staff year on year ensures that our customers receive the best products backed by industry leading service.
